APPENDIX "A"

COMMITTEE OF ADJUSTMENT 991 BARTON ST. EAST.

$$18.29 \times 2 = 36.58 \text{ m}^2 \\ = 393.8 \text{ ft}^2$$

6) Nature and extent of relief applied for:

TOTAL SIGN AREA: We are allowed to have 10.76 sq.ft. for every .5 meters of frontage. We have 18.29m of frontage and are therefore allowed 394 sq.ft. and we are applying for 494 sq.ft.

GROUND SIGN SET BACK: The set back is 6m and we are asking for a set back of 3m.

BUILDING SIGN HEIGHTS: A roof sign is to be 14.76' in height and we are asking to have it 15'-9" in height. Wall signs are to be 11.48" in height and we are asking to have the signs 13' in height.

7) Why it is not possible to comply with the provisions of the By-Law.

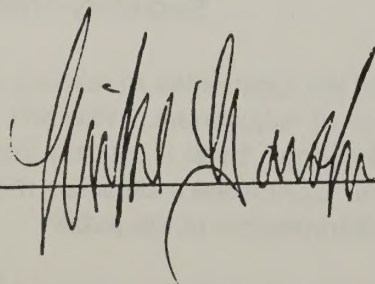

TOTAL SIGN AREA: Our property is extremely narrow and this reduces the amount of allowable signage. We require a normal amount of signage to keep our building design consistent from city to city, and standardized.

GROUND SIGN SET BACK: To the EAST there exists a 3rd Party "Billboard" sign which is currently set back 3m. To the WEST there exists a "Car Wash" building which is set back 6m. Our building is set back 9m, so we feel that because our building is completely blocked on "Both Sides" by existing structures, we require a "Road Sign" at a 3m set back to ensure our new business is noticed by passing traffic.

BUILDING SIGN HEIGHTS: This is consistent with our standard building design as prepared by our architects and used on all of our existing sites.

Thanks,

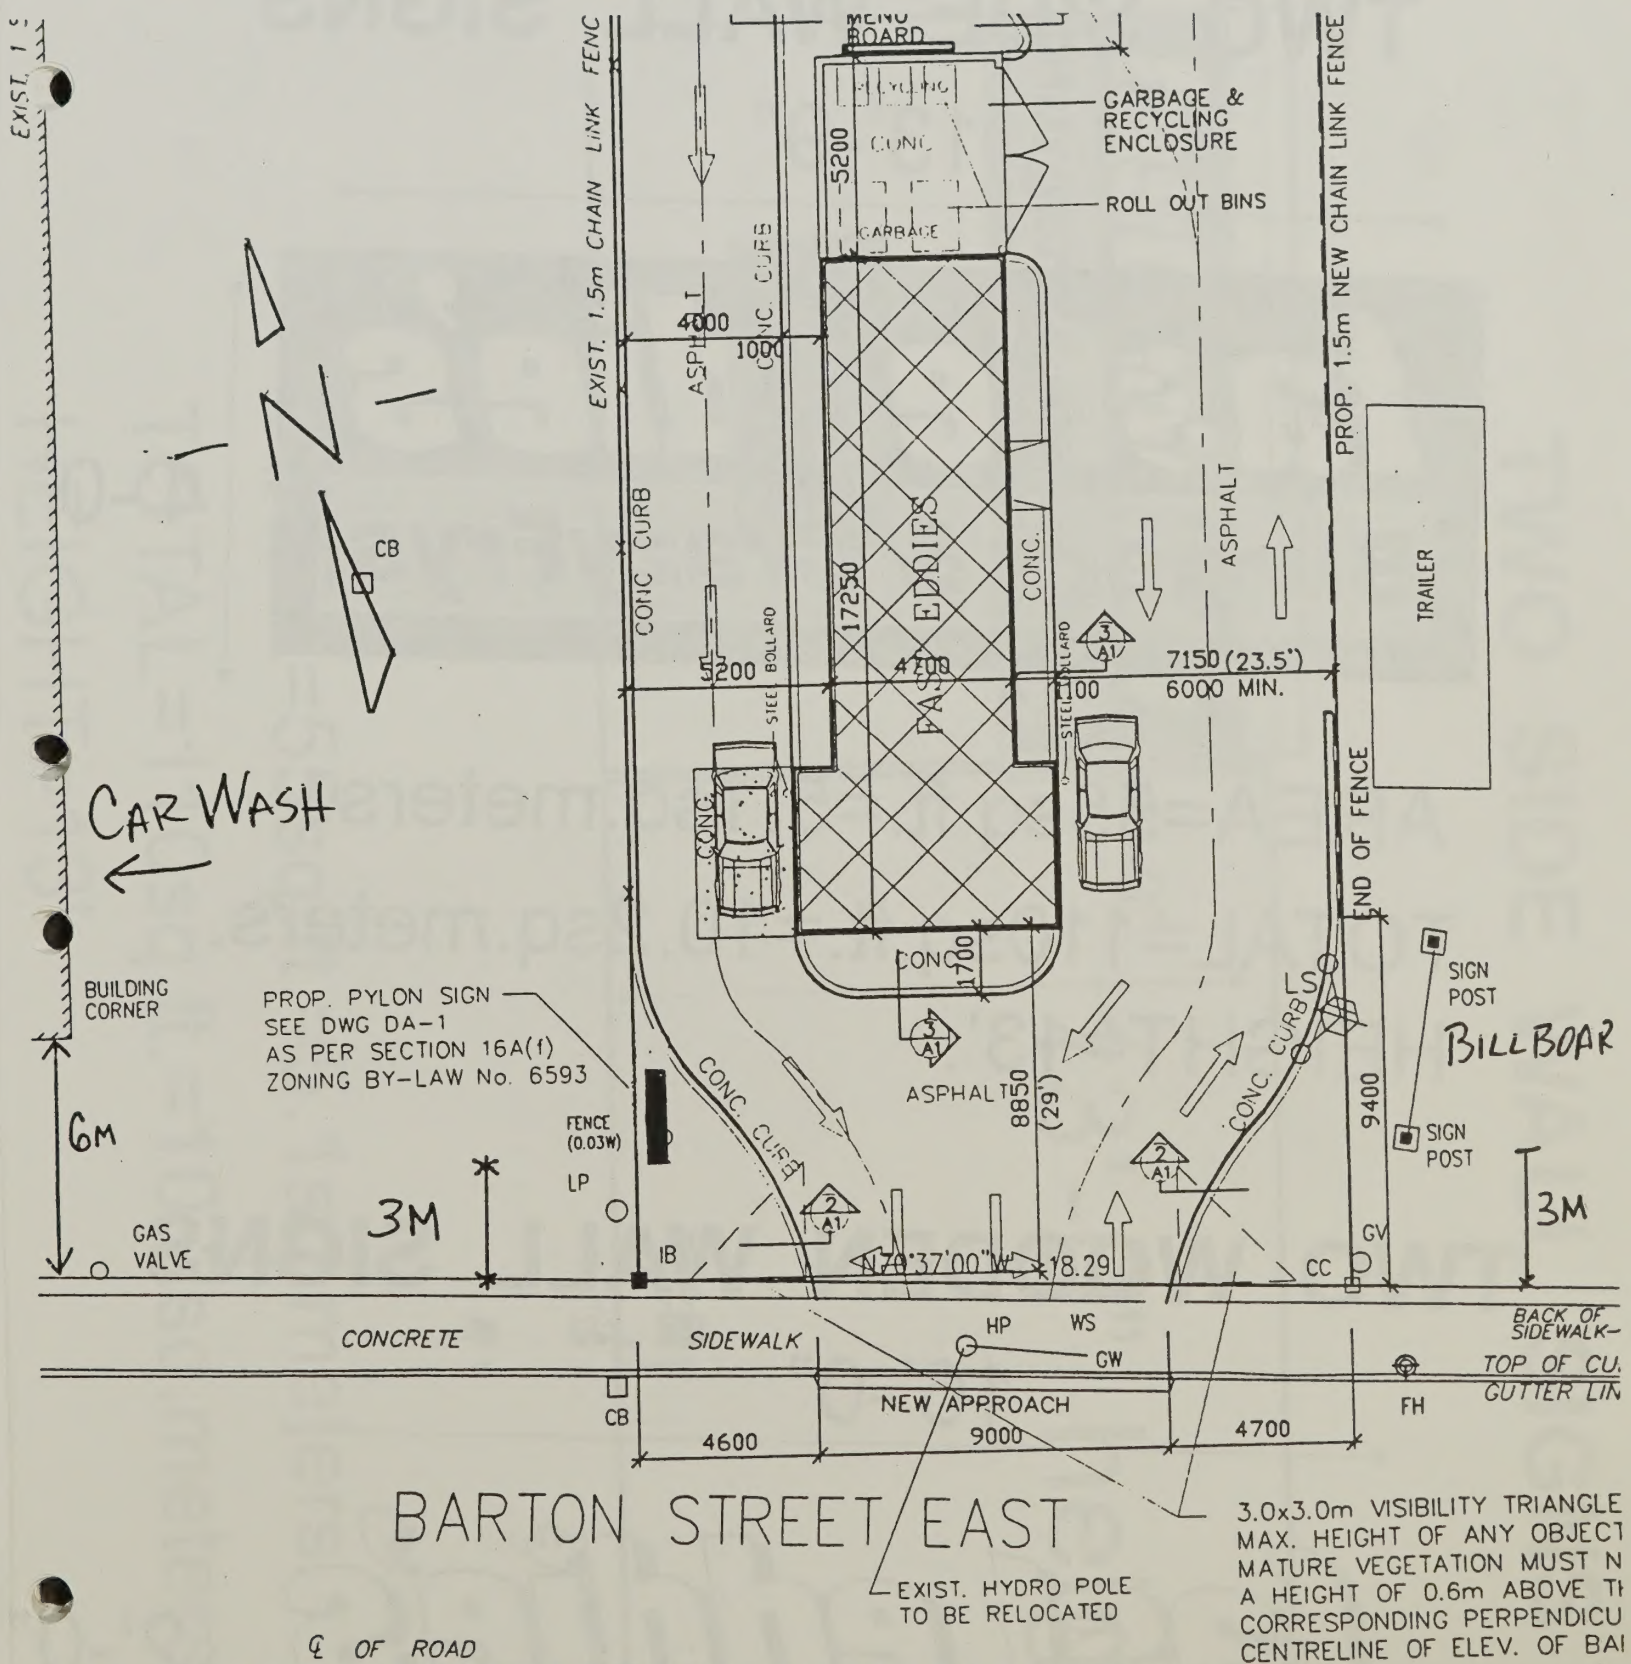

Mike Gorski:

footings that are wider or deeper. Consult your building department for requirements in your area.

Fill the footing holes with concrete and set the post bases while the concrete is still wet. Locating the post bases accurately is crucial: A mislocated post will plague you through every phase of construction, right up to the peak of the roof. One way to help set the post bases properly is to make a cardboard template of the post shape and trace this outline onto each post base with a felt-tipped pen. This will show you where the corners of the posts will be when the gazebo is finished.

If the gazebo is to be built on a deck, the post bases can be concealed beneath the decking, but if you will be building on a patio or slab, be sure to orient the straps so they won't be in the way when you're ready to install the railings.

Posts and Top Plates

To shape the octagonal posts, lay out the cut lines on all four sides of each post as shown on page 88. Lay out seven posts alike, plus one that is about 2 feet longer than the others. The excess length will be cut off later to form the hub for the center of the roof.

Set your circular saw to cut a 45-degree bevel, and rip-cut the corners of each post. A rip guide, sold as an accessory for most saws, will help keep the cut straight. A sharp blade is essential; with a standard 7¼-inch blade, you'll be cutting to the maximum capacity of the saw and taxing it to the limit. If the saw bogs down or the

1. The first part of the report is a general description of the project. It includes the title, the purpose of the study, and the scope of the work. The title is "A Study of the Effect of Temperature on the Rate of Reaction of Hydrogen Peroxide with Potassium Iodate." The purpose of the study is to determine the effect of temperature on the rate of reaction. The scope of the work is to study the reaction at temperatures of 10°C, 20°C, 30°C, and 40°C.

2. The second part of the report is a description of the experimental procedure. It includes the materials used, the apparatus used, and the steps followed in the experiment. The materials used are hydrogen peroxide, potassium iodate, and sulfuric acid. The apparatus used is a conical flask, a delivery tube, and a gas syringe. The steps followed in the experiment are: (a) preparation of the reaction mixture, (b) measurement of the volume of gas evolved, and (c) calculation of the rate of reaction.

3. The third part of the report is a description of the results of the experiment. It includes a table of the data obtained, a graph of the rate of reaction against temperature, and a discussion of the results. The data obtained is as follows:

Temperature (°C)	Volume of gas evolved (cm ³)	Time taken (s)	Rate of reaction (cm ³ /s)
10	10	120	0.083
20	20	60	0.333
30	30	30	1.000
40	40	15	2.667

The graph of the rate of reaction against temperature shows that the rate of reaction increases with temperature. The discussion of the results shows that the reaction is exothermic and that the rate of reaction is affected by the concentration of the reactants and the presence of a catalyst.

Dear Concerned Neighbours.

I would like to take this opportunity to say that I did appreciate your concerns last week at the committee of adjustments meeting even if they weren't to my benefit.

I listened to your concerns and felt some were very valid... and would like to take this opportunity to make some compromises that I hope may relieve you of further concern of my ability not to impact your quiet enjoyment of your homes and neighbourhood

I have re-evaluated my business plan and have come to the conclusion that if I Increased the Bakery retail and the offsite catering side of the business I would be able to decrease the café portion of the business significantly. I have calculated that I can successfully reduce the patron capacity from the current 50, (five parking spots) to 36 (three parking spots) and this in turn would greatly reduce the overall impact that the business operation would have on your personal enjoyment. I will even eliminate the windows and the doors that look out onto the alleyway and enclose the rear yard with fencing as to ensure total privacy to the abutting properties, I want to further ensure you that I will not altering the size of the subject building in any way, shape or form. I will only transform the ugly little building to something that is complimentary to the neighbourhood .

I am though, very reluctant at this time to even consider keeping the subject property an industrial use. As I feel that this would have an even greater negative impact on the overall neighbourhood let alone your personal properties than what my proposed plans would, as the city has spent millions of our tax payers dollars transforming this area into a beautiful streetscape, so I truly feel that my plan would only compliment our neighbourhood if given the opportunity.

If this is something that interests you , I really would appreciate something in writing from you, so as I may amend my application to reflect this idea.

I really do wish for your feed back on my compromise, whether positive or negative and I do hope you can show your support once again on ~~March 5, 2003 at 3 pm~~ **MARCH 19, 2003 AT 4:30pm**
My number is 905- 730-5342 and your written feedback can be dropped off in my mailbox at 72 Ferguson Ave N.

Thank you for your interests

P. 13, so as to permit the creation of a new lot to be utilized for agricultural purposes notwithstanding that:

- 1) A frontage of 102.1m (334.97') shall be provided instead of the minimum required frontage of 150.0m (492.12'); and,
